

TOWN OF WYTHEVILLE PAVING PERMITS

The Town of Wytheville requires residents and businesses to acquire building permits for the paving or installation of concrete, brick/pavers, or asphalt on parking lots, driveways, and parking areas. Applications for these improvements are available at the Town Office, 150 East Monroe Street, Wytheville, VA, and can be submitted by the contractor or the property owner. The cost of the permit is determined by the construction cost.

Some examples of when a permit is required are: new asphalt, concrete or brick/paver installation; asphalt or concrete or brick/paver installation over existing gravel, stone, tar and chip areas; milling and/or resurfacing of existing asphalt, concrete or brick/paver installation area; and expansion of existing asphalt, concrete or brick/paver installation areas.

Some examples of when a permit is not required are: sealing of existing asphalt, concrete or brick/paver areas, and no separate permit is required for asphalt, concrete or brick/paver improvements if an application is received for another improvement i.e., a house being constructed that proposes a concrete/asphalt/brick/paver driveway. The building permit application for the house should state that a concrete, asphalt, brick/paver driveway is proposed and it will be reviewed then.

Building Permit #: _____ (for reference)
